

Hang a Plane Strap System Instructions

You need to screw the ceiling adapters on your ceiling or under a shelf.

You can pass the straps or hook and loop in the second kit adapter side by side or you can cut them and attach as in the pictures below.

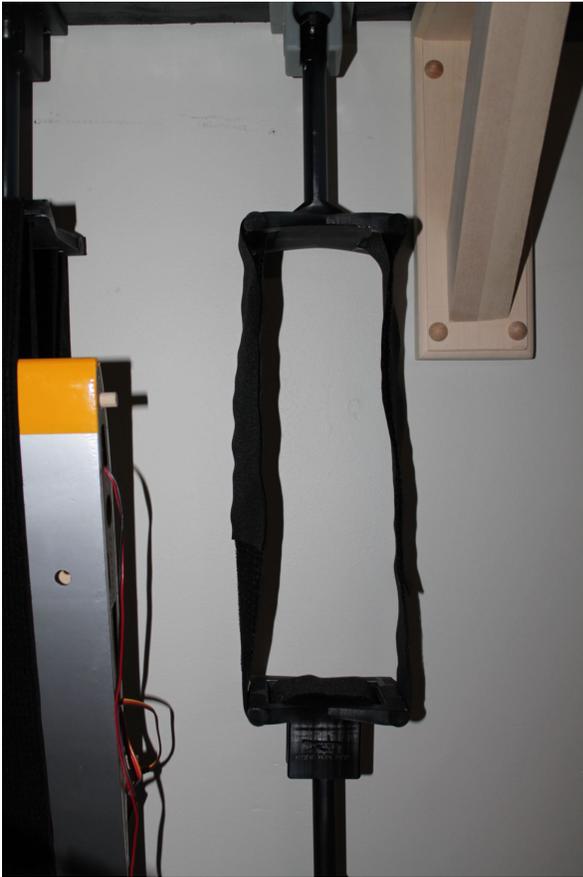

Ceiling/shelf adapter

You will receive a foam pad that should be glued at the flat side of your Second kit adapter.

How it should look

If you dont have the second kit adapter you just need to loop the strap as below.

You can also use the metal buckets to loop the strap on each side and double the capacity.
